### **EXPERIENCE**

Jacqueline has over 7 years of experience working in the GIS industry and has performed tasks ranging from digitizing installation facilities and extracted features from aerial imagery to working with Spatial Technologies' communication program converting Comm drawings using the Communications Visualization Component (CVC) tools. She is also an experienced member of Spatial Technologies' GPS survey team and has proven herself time and again collecting data in harsh environments on many USAF installations. She is well versed in the complete GPS life-cycle including establishing the initial baseline data, collecting in the field, post-processing data and final database compilation and delivery.

Jacqueline's previous experience as a member of the Armed Security Forces provided her with a strong background in Department of Defense security protocols and has helped to bolster Spatial Technologies' security program. She is also a key technician for Spatial Technologies' customer support service, which is responsible for monitoring and resolving technical issues within the 45<sup>th</sup> Space Wing's Communication Squadron through its Remedy and Axosoft trouble ticket software platforms.
